I came across Enxcl, while I was in search for a good institution to provide good foundation on programming languages to my son. Team from Enxcl suggested an 8 week introductory course. It was a very interactive training with practice sessions. Team from Enxcl is well equipped with proper training materials and efficient trainers and I strongly recommend Enxcl for training needs.

We are glad for choosing Enxcl for our daughter. Enxcl helped our daughter become more confident and the online nature of the tutoring makes it a low pressure environment where she did not hesitate to ask questions. The teachers are professional, caring, well organized and we feel so lucky and blessed to be a part of Enxcl. Due to this Covid 19, its really a great opportunity to find a platform for online tuition. Thanks again to Enxcl management, teachers, admin and staffs for giving such a wonderful space.
